

SIH AI-Driven Business Advisory Platform

Hackathon Presentation Pitch Deck

Empowering Rural Micro-Entrepreneurs in India with AI Feasibility, Government Scheme Matching, and Financial Advisory

Project Name: SIH AI-Driven Hyper-Local Business Advisory Platform

Target Audience: Rural Micro-Entrepreneurs, Self-Help Groups (SHGs), Rural Youth across 36 Indian States & UTs

Key Innovation: Village-level geographic feasibility + 18 Indian Languages + Auto Scheme Matcher + Bank PDF Proposal Generator

1. **Information Asymmetry:** Rural entrepreneurs lack local market feasibility data, leading to high failure rates.
2. **Scheme Unawareness:** Inability to discover eligible Central & State micro-credit schemes (PMEGP, MUDRA, DAY-NRLM).
3. **Language Exclusion:** Advisory software is predominantly in English, creating a massive access barrier.
4. **Financial Unreadiness:** Difficulty preparing bankable loan proposals, project costs, and EMI schedules.

- **Hyper-Local Mapping Engine:** Full coverage of all 28 States & 8 UTs (130+ Districts, 260+ Tehsils & Blocks).
- **AI Feasibility Engine:** Integrated with Google Gemini AI for SWOT analysis, market saturation, and risk mitigation.
- **Multilingual Accessibility:** Full support for 18 Indian Languages with native script displays.
- **Bank-Ready PDF Export:** Instantly exports formal business feasibility reports for loan applications.

- Frontend: React 19, Vite 8, React Router v7, Recharts, Custom Glassmorphic UI
- Backend: Node.js, Express 5, Sequelize ORM, MySQL Database
- AI & PDF Engines: Google Gemini AI SDK, PDFKit Report Generator
- Localization & Security: 2,300+ Translations, JWT Authentication, BCrypt, Helmet Security

- 36 States & UTs Database Seed: 130 Districts, 260 Tehsils, 260 Blocks, 260 Villages
- Financial EMI Engine: Real-time project cost, margin money equity, and repayment schedule calculation
- Dual-Tier Language Strategy: English & Hindi onboarding with full 18-language dashboard

Step 1: Auth & Language Selection -> Onboard in English or Hindi

Step 2: Location Selection -> Select State -> District -> Tehsil -> Block -> Village

Step 3: Business Details -> Select Category & Enter Available Capital

Step 4: AI Analysis & Scheme Matching -> View Feasibility Score, SWOT & Scheme Comparison

Step 5: Export -> Download Formal Bank Proposal PDF

"Good morning respected judges. Millions of aspiring rural entrepreneurs in India want to start micro-businesses, but over 60% fail within the first year due to lack of local market insights, complex scheme processes, and language barriers.

To solve this, we built the SIH AI-Driven Hyper-Local Business Advisory Platform. Our platform works at the village level across all 36 Indian States and Union Territories.

A user selects their exact location down to their village, enters their available capital, and selects a business category. Our engine instantly analyzes nearby competitors, calculates loan margins and EMI schedules, matches eligible government schemes like PMEGP and MUDRA, and uses Google Gemini AI to generate a comprehensive SWOT and feasibility score—all in 18 Indian languages.

With one click, the entrepreneur can download a bank-ready PDF business report to apply for financial assistance. Thank you!"
